

Marshalling Policies – Blackstock to KCC

Marshalling Move-In/Out Procedures

The Blackstock Lot will be used as a marshalling yard for the event. A map with directional information is included. There are 182 parking spaces available and will be labeled with a sign.

The purpose of the marshalling yard is to control the flow of traffic at the Knoxville Convention Center (KCC) or the World's Fair Exhibition Hall (WFEH) and help ensure that the move-in and move-out occurs in an orderly and timely fashion.

We have the systems below in place to help ensure a steady flow of traffic at the Knoxville Convention Center and the World's Fair Exhibition Hall and that emergency vehicles are able to access the area, if needed. Thank you in advance for your patience, cooperation and understanding.

Please Note: There is **NO PARKING ON OR BLOCKING THE LOADING DOCK RAMPS AT ANY TIME**. This is a Fire Lane and must be kept clear at all times

Please Note: Once the move-in and move-out processes are complete and the Loading Dock gate has closed, the area is no longer open to pedestrians or foot traffic. The main entrances to the Knoxville Convention Center are located off Clinch Avenue and Cumberland Avenue.

Move-In:

Each vehicle needs to report to the Blackstock Lot (Marshalling Yard) upon arrival during the designated move-in time. *Please Note:* there is an entrance gate on the south end of the lot that is nearly always locked and closed. Any vehicles needing to enter the Blackstock Lot will need to use the entrance off Blackstock Avenue between Tulip Avenue and Oak Avenue. Once the vehicle has entered the marshalling yard, report to the Marshalling Coordinator(s). Upon arriving at the marshalling yard, vendors will be checked in by the Marshalling Coordinator(s) and fill out the information sheet provided. No vehicles will be allowed to enter the Venue's loading dock without first checking-in at the marshalling yard and receiving the move-in pass from the Marshalling Coordinator(s). The Marshalling Coordinator(s) will send vehicles to the loading dock for unloading according to availability and space.

Move-Out:

Once booth/space is completely packed, an event may require you to pick-up a load-out pass from the Show Office/Manager located at the Venue. After receiving the pass, please report to the same marshalling yard as move-in and report to the Marshalling Coordinator(s). No vehicles will be permitted to load-out without presenting the move-out pass from the Marshalling Coordinator(s) to the staff at the loading dock. As space permits, the Marshalling Coordinator(s) will direct vehicles to the Venue's loading dock.

Thank you and welcome to Knoxville!
